Sir:

Pursuant to 37 CFR 1.56, the attention of the Patent and Trademark Office is hereby directed to the reference(s) listed on the attached PTO-1449. Unless otherwise indicated herein, one copy of each reference is attached. It is respectfully requested that the information be expressly considered during the prosecution of this application, and that the reference(s) be made of record therein and appear among the "References Cited" on any patent to issue therefrom.

Japanese Unexamined Patent Publication 2001-273538 (Application No. 2000-82593) is listed on the attached PTO-1449. This application is discussed at page 10, line 12 of the specification of the present application. As shown in Fig. 1 of the patent publication, a paper money processor 1 is provided with an attitude correction device 20 which corrects the attitude of a paper money P taken onto a carrying line 12 from a throwing-in part 4. A detection part 30 detects features such as the front or rear side, the top or bottom side, the denomination, the normal/damaged state of the paper money of which the attitude has been corrected. A front/rear side inverting mechanism 34 selectively inverts the paper money on the basis of the detection result in the detection part 30. A top/bottom side inverting mechanism 40 selectively rotates the paper money. Accumulation parts 54 and 61 to 64 arrange all paper money in the same direction to accumulate them by denominations. The paper money P taken out from the throwing-in part 4 is turned out and/or rotated on the basis of the detection result in the detection part 30 to automatically arrange all paper money P in the same direction.

This Information Disclosure Statement is being filed more than three months after the U.S. filing date AND after the mailing date of the first Office Action on the merits, but before the mailing date of a Final Rejection or Notice of Allowance.

Respectfully submitted,

Pillsbury Winthrop LLP
